MATSQUI

Mrs. G. H. Rottluff has as her guests her sister and brother-in-law, Mr. and Mrs. Peterson of Dakota.

Mrs. Howard Rottluff, Jr. entertained at afternoon tea last week with Mrs. Peterson as guest-of-honor.

Mrs. Geo. Beharrell has as her guest Miss L. Eryer, her aunt, a missionary from China.

Mrs. F. A. Beharrell entertained at the tea hour, when the guests enjoyed a talk on life in China, by Miss Eryer.

A pleasant evening was enjoyed on Friday, when guests of the Misses C. and M. Page were entertained by a talk by Miss Eryer, and by Miss Eileen Seldon of Vancouver.

Mrs. Roy Macell entertained at the tea hour on Saturday.

Miss Joyce Mundy spent the weekend with her parents. She is attending summer school in Vancouver.

Miss L. Carson of New Westminster is a guest of Mrs. Wm. Gurney.

Mrs. L. Beharrell and June and Alice have returned from a few days camping at Crescent Beach.

Miss Mineva Page, R.N. returns this week to her duties in Port Alberni hospital.

Constable and Mrs. Kench have returned from a week's holiday at Cultus Lake.

Born.—To Mr. and Mrs. J. Lundstrom, Matsqui, in the M.-S.-A. hospital on July 24, a daughter.

Miss Connie Farr of Vancouver is the guest of her aunt, Mrs. T. Fordsvan.

Mr. and Mrs. Jones and Mr. and Mrs. G. Shaw of Vancouver were the guests of Mr. and Mrs. A. Shaw last week.

Mr. H. Henderson, a recent arrival from Edinburgh, is the guest of Mr. and Mrs. A. Whitson.

Mr. and Mrs. Rankin and baby, who have been the guests of Mr. and Mrs. Whitson the past two weeks, have returned to their home at Powell River.

Mrs. MacKinnon and children returned with Mrs. Rankin and will spend some time at Powell River.

A large crowd attended the dance in Matsqui hall on Friday evening. Proceeds went to the aid of the Matsqui public school band.

SPORT BRIEFS

See Bearded Ballplayers in Action

A large number of baseball fans from here flocked to Chilliwack last Thursday evening to see the classy House of David baseball team meet the Chilliwack nine. Although the issue was never in doubt, the game was interesting to watch. Two local players are on the Chilliwack team—Howard Ralston and W. Scott of the Royal Bank staff.

Lively Game at Cultus Lake

Abbotsford's exhibition softball tilt with Cultus Lake at the resort last Wednesday turned out to be one of the best games the locals have enjoyed this year. Playing tip-top ball, Abbotsford, despite consistent bad calls by the umpire (for whom Cultus Lake players apologized, by the way,) the locals came from behind to take a two-run lead when the game was called owing to darkness. 7-5 was the score when the fracas was over, with the bases loaded and none down in the locals turn at bats. Perhaps it was just as well the game was called!

Another Win for Atangard

The Atangard softballers defeated the mill 12 runs to 3, on Friday evening. The mill men started out well, but quickly weakened after the hotel boys took the lead.

All-Stars Win in Vancouver

Abbotsford all-stars softball team made a trip into Vancouver on Saturday evening, where they defeated the West Hotel team, 8 runs to 4. The locals played excellent ball, and hit in the pinches. "Tar" Wright laid on the willow for two home runs.

Boxa Players Need Opposition

"No opposition" states Manager Jim Roberts as the reason for inactivity among lacrosse enthusiasts just now. It seems that the Chilliwack organization, with whom Abbotsford hoped to have many battles, are not faring so well themselves, and it is hard to get any games arranged.

Abbotsford All-Stars journey to Cultus Lake on Sunday to settle the issue with the lakeside softballers. It seems that Abbotsford's peppy exhibition last week made a hit, and the vacationists there are hollering for more.

The Alaska Highway a "Military Project"....and Why Not?

Certainly the construction of a trunk highway link through British Columbia and joining Alaska with the State of Washington would do much to cement international friendship and to aid industrial development of the British Columbia Interior. It is noted that George Murray, M.L.A., is self-appointed ambassador to endeavor bring this project to actuality, and the public at large, if not his political colleagues, commend him for his initiative. Objection has been voiced that the proposed Alaska Highway is really a military project. Possibly it is. British Columbians naturally ask themselves the question: if in case of a war between the United States and, say, Japan, where should we turn for protection against possibility of becoming another Belgium?

THIS Lulu Island farmer uses a portable 7 1/2 h.p. motor for power jobs. It is small and clean. It operates at constant speed, with no vibration and little noise. Rugged in construction, it will give a lifetime of service.

Game Board Releases 6,000

Pheasants: Cuts License Fees

Six thousand pheasants are being liberated throughout the province this year. Game Warden Williams states, of which aggregate over 300 are apportioned to Sumas area. The severe flood wrought havoc with bird life in the Sumas lake and marginal area, and hunters were planning to seek their pheasants in the Ashcroft-Kamloops section, where they are plentiful. But this will not be necessary, the warden says. He has distributed 100 in Matsqui, 100 around Agassiz and 100 on Nicomen Island. Two-thirds of the birds are imported from the state of Washington at an approximate cost of \$1.25 for each bird.

Sealing license fees somewhat to conform to the public purse, the levy this year will be \$2 for legitimate farmers, giving them right to hunt birds, deer and black bear anywhere in the province. Farmers confining their hunting to their own properties will pay no license fee, but the fee will be \$3 for the general public.

MOUNT LEHMAN

Mrs. A. Tucker and sons have left for Regina, where they will visit for some time.

Guest of Miss Annie Simpson last week was a former schoolmate, Miss Annie Johnson of Vancouver.

Mrs. McAskill and sons are holidaying at Cultus Lake.

Recent guest of Mr. J. Taylor was Mr. E. Chowan of Bentley, Alta.

A miscellaneous shower was held last week at the home of Mrs. L. Patterson, honoring her sister Miss Lena Donatelli, whose marriage takes place shortly.

Miss Nellie Coghlan is visiting relatives in Portland for a week.

Honoring Miss Louise Thompson, whose marriage takes place early in August, a shower was held in the United church last Friday. About 50 guests attended, and the bride-to-be received many beautiful and useful gifts, including a carving set from the C.G.T. group. The hostesses were Mesdames Farber and D. R. Nicholson.

POLICE CHECK AUTO LIGHTS

Constable J. H. Davey of the B. C. Police, intercepted several automobiles in Abbotsford last week, checking driver's licenses and headlights. As a result three local residents paid fines for small infractions. They were Mm. McGuire, Mt. Lehman, for driving his car with but one light, and M. Nicholas, Clayburn for a similar infraction. The third case is yet to be held.

Police report they are now making a strict check-up of "one-eyed" cars, following complaints.

BRADNER

G. H. Leach has blossomed out as a placer miner, to be worried at the outset by an attempted claim-jumper. His property is on the Fraser River near Yale.

Mrs. R. Clutts and Miss Lola Lesar, nieces of Mr. C. Lesar, and Mr. Clutts, all of Thebes, Ill., U.S.A., visited their uncle in Bradner at the week-end. The party were en route home after an extended trip through California and British Columbia.

Guests of Mr. and Mrs. W. Winchester on Sunday were Messrs. George and Joseph Birnie of Portland, Ore.

One of the most generous list of prizes offered at a local exhibition is being assembled for the first annual Central Fraser Valley Fall Fair, to be held in Abbotsford on Friday, September 20, on the Jubilee grounds. Final details for the list are almost complete, and the booklet will be issued within the next two weeks.

Peardonville Live Y's plan their annual sports day for Friday August 16, when silver trophies will be competed for by members of clubs belonging to the Fraser Valley Young People's Federation. A dance in the Matsqui hall will wind up the day's proceedings.

\$8.00 for 1000 fine grade bond letterheads and 1000 business envelopes, cash with order. Envelopes are No. 8 in size (not No. 7) and you pay no sales tax or express. Your own copy, neat printing. SUMAS DISTRICT

Working westerly from Barrowton, government road contractors are today at a point near Dave Brown's at the road curve opposite the Beltrame place. The surfacing crew expects to complete a mile every three days.

Mr. and Mrs. Peter Reimer, Upper Sumas, announce the marriage of their only daughter, Mary, to Mr. Finlay North, of Upper Sumas, in Beltrame on July 21. Mr. and Mrs. North will reside at Pitt Meadows.

Mr. and Mrs. Halliday, of California, parents of Mrs. H. N. Ord, who were her guests recently, have left for England, where they will tour.

Raspberry harvest is now well over the peak, with former large growers such as L. L. Curtis and J. Frith, McKenzie road, picking but a fraction of their former acreage.

Bridges in Sumas lake area, wrecked by the flood, have now been rebuilt and practically all the roads are again open to traffic.

G. A. MacKay is doing the plumbing work on S. Mathey's house, Huntingdon.

Mrs. F. Beltrame has returned from a visit with her brother in Portland.

Ex-Reeve M. Murphy is disposing of his dairy equipment in the lake area, another discouraging result of government inefficiency in colonization projects.

Milk producers of the State of Washington cannot operate profitably at the prevailing price of \$1.72 (less 20c for transportation) per 100-lbs. of standard milk, declares Dr. R. Prior, state director of dairies and livestock. Milk would have to retail at 15cents a quart if dairymen were to receive a "fair profit" for their labor and investment, he stated.

DUST MAKES SUMAS DETOUR DANGEROUS TO AUTO TRAFFIC

Vye road and the old highway, now used to detour traffic while the new route is being surfaced, are dangerous to motorists because of dust. So thick is the "fog" raised by the heavy traffic that visibility is reduced to zero where several vehicles are traveling within a few hundred feet of one another. It is suggested that the Sumas Council and Board of Trade ask the government to oil the route in the interests of public safety.

GROUP LEADER INJURED

Harold Martin, president of the Peardonville Live Y club, suffered a serious accident last week. While at work in the barn of his employer, W. S. Hill-Tout, he fell from the loft to the floor, a distance of about forty-five feet, breaking his pelvis. He will be confined to the M.-S.-A. hospital for at least two months.

Fifth annual picnic of former Californians and residents of Southern Alberta takes place in Stanley Park next Wednesday afternoon.

WORLD HAPPENINGS BRIEFLY TOLD

The tri-centenary of the death of Champlain was observed in Paris with exercises emphasizing Franco-Canadian friendship.

Princess Mary, daughter of the King and Queen, has left the hospital where she underwent an operation June 4.

A decree by Adolf Hitler whereby the ministry of war is given permission to enlist foreigners in the German army has been announced.

The Daily Mail said experts are working on behalf of Imperial Airways, with the support of the government to complete a detailed plan for north trans-Atlantic service.

The London Daily Express says Germany now possesses a fleet of war tanks, despite the fact they are specifically forbidden under the Treaty of Versailles.

Want to buy an island? Fanning Islands, Ltd., has two for sale—the Fanning and Washington islands located 1,000 miles south of Honolulu—but they must remain British and purchasers must be British subjects.

The French government, facing a budget deficit of from seven to eight billion francs (approximately \$462,000,000 to \$528,000,000) for the current fiscal year prepared to make drastic administrative economies.

U.S.S.R. press charged Japan's "deliberate provocations" along the Siberian border and Germany's preparations to attack European Russia placed the Soviet in grave peril of war.

It was learned that Hon. W. J. Roche, chairman of the civil service commission, has tendered his resignation to the government and it has been accepted. He will, it is understood, receive a gratuity of \$7,500, one year's salary, on retirement.

Soldiers On Guard

American Government To Bury Many Millions In Gold

United States government gold valued at many million dollars will be buried in the middle of Fort Knox, Ky., where 1,300 soldiers are on duty.

Treasury draftsmen, it was disclosed, have been ordered to rush construction of a huge underground vault at the army post as part of the government's policy of removing monetary stocks from vulnerable coast cities.

Much gold now stored in New York and Philadelphia will be transferred to Fort Knox. Not long ago nearly \$3,000,000,000 were sent from San Francisco to Denver. Rocky Mountains and the Appalachians thus will guard the precious bullion from any possible enemy invasion or mobs.

The government's gold stocks total more than \$9,000,000,000.

Making Tour Of World

Dr. E. Cora Hind Will Write Special Articles During Trip

Dr. E. Cora Hind, distinguished newspaper woman, who was recently honored by the University of Manitoba, sailed from Montreal on the Duchess of York for an 18 months tour of the world. Miss Hind, whose ability as a judge of standing crops and of livestock has made her a noted figure in the Canadian West and earned for her an unique place in journalism will visit the agricultural countries of Europe as well as the new lands where fresh furrows are being broken, writing en route special articles for the Winnipeg Free Press, with which journal she has been for many years.

Ran With The Hounds

Fox Used Great Cunning In Making Its Escape

During a meet of the Boyle Harrier's Hunt in northern Ireland, a fox broke cover and started across country, with the hounds following in full cry. Shortly afterward the huntsman noticed what he thought was a strange dog running in the midst of the pack, but on getting closer he saw it was a fox. The intruder kept with the hounds, which intent on hunting another fox, took no notice of it. When the hunt was passing close to a brush-covered hill the "visitor" suddenly bolted into the brush and disappeared.

Pessimistic commentator says farming has been tough ever since the auto replaced the horse. It still looks back to its hay day.

Within a 50-mile radius of Spokane, Wash., are more than 90 fresh water lakes.

Dies In Poverty

Hero Was Rewarded With Medals, But Could Not Get Work

They pinned medals on Salvatore Bracco, Italian-born American seaman, a few years ago for his heroism in two rescues on the high seas. When the S.S. President Harding saved the crew of the stricken freighter Ignazio Florio in 1925, Bracco was the first into the lifeboat which took 38 men from the freighter just as it sank. He got medals from five cities and a scroll from Benito Mussolini for that.

Greater recognition came in 1929 when the S.S. America rescued the crew of the ship Florida off the Virginia Capes. First to volunteer for the lifeboat crew, Bracco directed the rescue work. Former Mayor James J. Walker gave him a medal for his heroism when his ship reached New York. Later he received the congressional medal of honor, two more medals from Italy and six from American cities.

Seaman Bracco died in New Jersey recently in poverty. Ill with heart trouble, Bracco had been supporting his wife and son on a weekly relief grant of \$7.50. "Those who pinned medals on me and shook my hand wouldn't give me a job," he complained bitterly to his son a week before he died.

Cavell Grave Neglected

Resting Place Of Martyred War Nurse Is Uncared For

Complaints that the grave of Edith Cavell, the martyred World War nurse, is neglected have aroused indignation in England. Visitors to Norwich declare that evidently no care is given it. Nurse Cavell was born at Swardeston, a village four miles from Norwich, and lies buried in Life's Green, close to Norwich Cathedral. Some time ago the public was aroused to protest against the scant attention paid to her last resting place, which many people from all parts come on pilgrimage to see. The responsible authorities, apparently the Dean and Chapter, took the matter in hand, but to-day fresh criticism is made of the condition of the grave. One observer declared that it is covered with rough gravel and seemingly had been a playground of dogs. On it lay the remains of a wreath of artificial poppies and a few bedraggled daffodils.

Recipes For This Week

(By Betty Barclay)

SOUR CHERRY JELLY

3½ cups (1½ lbs.) juice
7 cups (3 lbs.) sugar
1 bottle fruit pectin

To prepare juice, stem and crush about three pounds fully ripe cherries. Do not pit. Add ½ cup water, bring to a boil, cover, and simmer 10 minutes. (For stronger cherry flavor, add ¼ teaspoon almond extract before pouring.) Place fruit in jelly cloth or bag and squeeze out juice. Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire, and at once add bottled fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard ½ minute. Remove from fire, skim, pour quickly. Paraffin at once. Makes about 10 glasses (6 fluid ounces each).

STRAWBERRY FROSTING

2½ cups confectioners' sugar
¼ cup sweetened condensed milk
¼ cup fresh strawberry pulp
1 tablespoon lemon juice.

Stir sifted confectioners' sugar into sweetened condensed milk. Force enough strawberries through coarse sieve to make ¼ cup pulp; add with lemon juice to first mixture. Beat until smooth and creamy. Spread on cold cake. Makes enough frosting to cover top and sides of loaf cake, top of 2 (9-inch) layers or about 1½ dozen cup cakes.

New Powerful Ray

Nazi newspapers reported a new radio-active micro-wave had been discovered in Germany. Scientists declared the new ray was more powerful than the Hertzian rays and would be of great value in signalling the approach of ships. A ship coming into contact with the ray-beam would immediately signal its location through a loudspeaker installed on the vessel sending out the waves, it was said.

War Memorial Fellowship

Cecil Edwin Hall, Edmonton, was the winner of the First War Memorial Fellowship, \$500, it was announced at Toronto recently by the Alumni Federation of the University of Toronto. Hall is an honor graduate in physics of the University of Alberta.

THE NEW HOUSEKEEPER (MR. BALDWIN): "Oh, yes, Mr. Bull, I'll see to the little dear! And I do hope you'll have a real good holiday, sir!" —News of the World.

National Youth Administration

United States Offering American Youths A Chance In The World

President Roosevelt has established a "national youth administration" to meet what he called a "great national need" by offering unemployed youth of the United States "their chance in school, their turn as apprentices and their opportunity for jobs."

The new agency will be under the work relief program. The president set aside \$50,000,000 to be used in providing work, apprenticeships in private industry, in offering high school and college training for those between 16 and 25, and in giving relief to youths.

The new undertaking was put under the direction of Miss Josephine Roche, assistant secretary of the treasury, and Aubrey Williams, assistant to Harry L. Hopkins, works progress administrator.

Mr. Roosevelt, in announcing the plan to aid an estimated 500,000 of young men and girls, said:

"I have determined we shall do something for the nation's unemployed youth because we can ill afford to lose the skill and energy of these young men and women."

An average payment of \$15 a month for youths on work relief was fixed; \$6 a month would be given to those going to high school and \$15 a month to youths in college.

"A party platform is a mighty important consideration," said one statesman.

"Yes," replied the other, "a party platform in politics is a good deal like a bunker in golf. The rules require it, but you show your skill in avoiding it."

Dutch children are fortunate. They can now learn their geography by flying over the portion of Holland which is their lesson for the day. The government has put aeroplanes at the service of the schools for the purpose.

Leprosy Cure

Report French Scientists Have Obtained A Positive Culture

Two French scientists have obtained a positive culture of the leprosy bacillus for the first time in medical history, it was announced before the French Academy of Medicine.

Dr. Albert Vaudremer, distinguished bacteriologist, aided by a young woman assistant, Mile. Brun, presented the results of seven years' research to the academy. Their experiment resulted, for the first time since 1871, when the Norwegian scientist Armauer Hansen isolated the leprosy bacillus, in a positive culture of the deadly organism.

Dr. Vaudremer said the bacillus as cultivated in his experiments was agglutinated by serum taken from leprosy sufferers and that this serum destroyed within 24 hours the leprosy bacillus.

The Canadian Nickel

Finance Minister Would Like To Change The Design

If there weren't so many slot machines in Canada, Finance Minister E. N. Rhodes would change the design and size of the Canadian nickel. Pressed by Hon. W. D. Euler (Lib., North Waterloo) in the house to make the nickels smaller, Mr. Rhodes said they were in his opinion "one of the most hideous coins we have."

Because of the number of slot machines, telephones, for instance, he could not change the design and he hoped in the future it could be done, making the coins "more in keeping with artistic tastes."

Beaver From Germany

So they're carrying coals to Newcastle. At the end of a long journey from Hamburg, Germany, 40 nutrias, a species of beaver, arrived at Edmonton. They were imported for fur production in the land of the beaver.

The Custer Massacre

Sioux Warriors Now Say Gen. Custer's Death Was Inadvertent

The killing of General George A. Custer—massacred with all his men 59 years ago—was "inadvertent," Barron Brown, an artist, said he had been told by participating Sioux warriors.

Because of an earlier friendship, Sitting Bull had ordered the General's life be spared, Brown was told by Little Soldier and other survivors of the band which defeated Custer at the battle of Little Big Horn.

"He was the last of the command to be killed," Brown was informed. "His death was inadvertent."

Brown said he had broken down the stony silence of the red man while painting portraits of the Standing Rock Reservation in North Dakota. There reside more than 20 participants in the famous battle.

They told him: Had another American fighter, Reno, not struck at the retreating Indians, Custer would not have been attacked.

Rain-In-The-Face did not cut the heart out of Tom Custer, the General's brother, as some reports have stated.

The Sioux warriors did not mutilate their victims. That was done later by the old women and the youngsters.

Custer was not scalped. He had his long curly locks sheared off before the battle.

The reason the Indians stripped the whites of clothing was because they believed it would be needed during the retreat into Canada.

Have been gained by Canadian with army rifles sold to them by dishonest government agents.

Abandon System

Ontario Is To Discontinue Relief Work On Roads

Hon. Peter Heenan, Ontario minister of lands and forests and northern development, announced at Port Arthur at a banquet in celebration of the opening of the Great Lakes section of the Trans-Canada highway that the Ontario government will, in future, let contracts for its road building.

The relief camp system, under which jobless worked at highway construction, was at least twice as expensive as the method proposed by the government, he said. A mile of road could be built by a contractor, for half the cost of the relief camp system.

Under the camp system, Mr. Heenan said, with a \$5 a month allowance for the men, a section of road in northwestern Ontario had cost \$55,000. A contractor would build it for half that amount and would have paid fair wages.

Widely-Known Physician

Dr. McCrae, Brother Of Canadian Poet, Dies In Philadelphia

Dr. Thomas McCrae, widely-known physician and author of medical works, died recently in Philadelphia, weakened from an operation. He was 64 years of age.

Native of Ontario, Dr. McCrae was a brother of the Canadian poet, John McCrae, a lieutenant-colonel in the Canadian Army Corps. He was an associate of Sir William Osler.

For 23 years, Dr. McCrae had been professor of medicine at Jefferson Medical College, Philadelphia. In 1927 he was physician to J. Ramsay MacDonald, when the then prime minister of England visited the United States.

National Crisis

Monaco Is Suffering From The Effects Of Depression

Monaco, where fortunes are lost and won on the turn of a wheel, is seething with unrest in a national crisis born of the depression. The country's budget is unbalanced, hotels and shops are nearly empty and unemployment is widespread among the 22,000 inhabitants, whose principal work is serving tourists. Gambling receipts for the year ending March 31 were estimated at 70,000,000 francs, a drop of 24,000,000 from the 1931 figure.

To Fit The Crime

In England, says the Toronto Star, motorists convicted of reckless driving have their driving licenses suspended for two years. In Czechoslovakia the policeman does not arrest a speedster and cause him to be fined. He stops the car, lets the air out of all four tires so that the speedster has to carry a while and pump his tires full again.

All men are born free and equal, but most of them get married.

Little Journeys In Science

ATOMS

(By Gordon H. Guest, M.A.)

Many years ago John Dalton, an English schoolmaster, gave to science a very important theory concerning the structure of matter. This theory, which is known as the atomic theory of matter, assumes that every chemical element, such as oxygen, iron, or gold, is made up of small indivisible particles called atoms; that the atoms of different chemical elements have different weights, but those of a particular element are alike and constant in weight; and that chemical compounds, such as common salt and water, are formed by the chemical union of the atoms of different elements. Thus, an atom of sodium combines with an atom of chlorine to form the smallest particle, known as the molecule, of table salt, while two atoms of hydrogen combine with one atom of oxygen to form a molecule of water.

Recent studies of the properties of matter force scientists to assume the existence of particles still more minute than atoms; so Dalton's idea of the atom has been changed somewhat. The modern scientist believes that the atom is composed of tiny particles of negative and positive electricity, respectively known as electrons and protons. Although a proton weighs as much as 1845 electrons, its positive charge is exactly equal to the electron's negative charge. Each pulls as much as the other.

There are 92 elements and hence there are 92 kinds of atoms. Hydrogen atoms, consisting of only one proton and one electron, are the lightest. Uranium atoms are the heaviest, having 238 protons, and 238 electrons. In all atoms, the electrons are alike and interchangeable, like standardized bricks used in all sorts of buildings. It is believed that the electrons are revolving around the protons, which are located in the centre or nucleus, very much as the earth and the other planets revolve around the sun.

Under normal conditions the diameter of a hydrogen atom is estimated to be about a hundred millionth of a centimetre (2.54 centimetres equal 1 inch), which appears to be about twice the usual distance of its electron from its nucleus. The size of an electron is not known with accuracy but it is a very small fraction of the size of the whole atom. The nucleus, or central sun, appears to be still smaller. Thus an atom is largely a vacuum. It has been calculated that if the nucleus of a helium atom were represented by a pea, its two planetary electrons could be represented by two peas a quarter of a mile away. The electron of the hydrogen atom travels around its tiny orbit very rapidly, going, under normal conditions, about fourteen hundred miles per second. This means that it has to revolve seven billion times in one millionth of a second. These facts show that electrons and atoms are far too small for our comprehension; they belong to the world of the almost infinitely little. It is a marvelous fact that these tiny particles of matter, like the heavenly bodies, are never at rest.

The information concerning the structure of atoms has been obtained by the wonderful instrument known as the spectroscope, by X-rays, and from a study of such elements as radium, which are continually breaking down into other elements.

Secret Of Magic Sword

Weapon Of Serbian Heroes Was Made Of Nickel Steel

The old Serbian "heroes" of the Dark Ages, according to legend, were armed with "magic swords which cut through their enemies' armor." Now a mining prospector, examining ancient workings in old Serbia, believes he has discovered the secret of those "magic" weapons. They were made, not of iron, but of nickel steel. In an old working he came on a piece of metal which is probably the oldest piece of special steel in existence. In vain he tried to bore a hole in it. Finally he sent it to Vienna to be examined. Here again difficulty was experienced in piercing it and analysis showed that it was nickel steel of peculiar hardness. The circumstances under which this piece of steel was found suggest that it is at least 1,000 years old—that is, it was in existence 950 years before nickel steel was rediscovered.

Actor Stops The Show

A comic singer wearing a hat of the Mussolini type caused a theatre to be closed by the police in the port of Braila, Roumania. His act contained an ironical song at the expense of Signor Mussolini, which was a considerable success—until the Italian consul heard of it. The following day the police closed the doors of the theatre.

Boys are not as good sleepers as girls, according to tests made by an Atlanta physician. His conclusion comes after 150,000 hours of watching children sleep, by means of special electrical instruments.

When exposed to red or infra-red light, certain types of diamonds generate electricity.

PATTERN 5374

Top your dress with handmade neckwear and you'll be right in step with Fashion's latest. With knitting needles clicking wherever one goes, you will be right in the swim if you knit your neckwear. If crocheting is your choice, the lovely lacy jabot will fill your bill. The round collar in perle cotton is knitted in a simple lacy stitch—points solid, the open part in a fagoting effect. The vestee with turn down collar is straight ahead knitting in a simple pattern that is repeated throughout. And the whole thing is made of two straight pieces joined at the center. It is lacy and has the flare that makes a jabot graceful.

In pattern 5374 you will find complete instructions for making the two knitted collars and the crocheted jabot shown; an illustration of them and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. They are met at the railway station by Columbine Nelson, who in turn introduces Mark and Matthew Adams, two neighbors of Aunt Columbine, and the party set out for Pine Ridge, which village causes dismay to both Nancy and Jack because of its dilapidated appearance and general look of poverty.

No Go On With The Story

CHAPTER VII.—Continued

"It's gorgeous, isn't it?" breathed Nancy, truly impressed. "I—I'm sure I'm going to love this room."

Cousin Columbine smiled. "It's our best, and I'm glad to see that you appreciate it. Jack will be next to you with only a door between. I sleep downstairs; and as I stated in my letter, Aurora goes home at night. Victor Tubbs is an invalid, or thinks he is, which amounts to the same thing, and his wife has supported him for years; a state of affairs that satisfies them both, though it makes me furious. However, it's none of my business; and if Aurora wants to work her fingers to the bone for such a lazy specimen, why worry, as Mark Adam would say? Now I'll leave you in peace. No doubt you'll prefer to unpack alone though Aurora was itching to see your wardrobe, and if she had, not so much as a safety pin would have escaped her eyes, and the account would have been spread from one end of Pine Ridge to the other before she slept tonight."

The old lady moved toward the door, then stopped to add: "If you need a lamp, the matches are in that tin box on the wall. Supper's at six sharp, so Aurora can get home to feed her precious Victor. There's water in the pitcher; but you may wash in the bathroom if you prefer."

She was gone at last, leaving Nancy rather breathless with instruc-

tions. Jack had departed to his own quarters, and the girl stood quite still, looking about curiously. She had meant the view, of course, when she told Cousin Columbine that she loved the room. Now, sitting down suddenly on a straight, uncomfortable "bedroom chair," she wondered how it was possible to get so many ugly things into one place.

The bed! Towering black walnut, ornately carved. It was cold comfort to remember that her grandfather had had one almost as hideous at Edgemere. A bureau to match: even a washstand, behind which hung a square of linen to protect the wall paper. Hadn't she heard somewhere that they were called "splashers" in the dark ages when people used such things?

Nancy arose to regard this curious antique on which, embroidered in red cotton, was an infant splashing happily in a wash bowl, with the words, "Our Darling," below it. Horrors! Must she live with that monstrous baby for months and months? Must she wash in that bowl—even brush her teeth into it?

The girl could have wept for her own tiled dressing room; then remembered that it was hers no longer anyway. She turned slowly to observe a marble-topped table between the windows—a patent rocking chair upholstered in flowered carpet—a shelf above the air-tight stove on which stood two blue vases and what appeared to be a mound of mineral specimens mysteriously glued together, with a clock in the centre, a silent timepiece now, probably useless save as an "ornament."

Nancy's eyes lifted to the wall paper, a nondescript, faded tan, which, she decided, "might be worse." But the pictures (only two, thank goodness!) were simply terrible: an oil painting of a deformed looking kitten playing with a ball of yarn, and a steel engraving of General Grant. Could anything be more depressing.

As if to get away from all these objects, Nancy moved to a window, half sick at thought of the long weeks ahead. Night was descending, and even the Peak, rising now against a gloomy sky, looked austere and forbidding. All the excitement of their arrival—the elation she had felt during the wonderful ride in Mark Adam's flivver—her interest in this new part of her own country—even the girl's sense of humor, were lost in an attack of overwhelming homesickness.

Aunt Louise had been right, she told herself. They shouldn't have come so far away. This terrible room! What about the girls at home think if they could see that washstand? And the pin-cushion. Why it was bigger than a boudoir pillow! And what in the world was she going to do with herself when the duties that Cousin Columbine imposed were finished? There would be nothing—absolutely no way to kill time. This thought, to pleasure-loving Nancy Nelson was appalling—not to be endured. Her unhappy eyes, resting on Pike's Peak, saw only a closet filled with dancing frocks, and a white fur wrap that she had never worn. She had to wink to keep the tears out of her eyes as she vowed audibly:

"I'll write to-night and tell Dad everything. Didn't he say that homesickness might as well be fatal? He'll understand. He'll send for me if he has to borrow money for the ticket. Jack will call me a slacker, but who cares? I just can't stand it here. I'd almost rather die than stay. What can there possibly be to interest a girl like me in a dreadful, ramshackle, down-at-the-heels settlement like Pine Ridge, Colorado?"

Later Nancy was to realize that as she stood there, oblivious to everything save self-pity, she hadn't known what sort of girl she was.

CHAPTER VIII.

"There's nothing," observed Jack from the door of his north-east bedroom, "like good, thick, sirloin steak to bolster up a morale that's slipping. Remember that, Sis."

It was eleven at night, and Nancy, attired in a wadded dressing gown of crimson silk, turned from the bureau to ask coldly: "May I inquire whose morale you have in mind?"

Her brother smiled as he investigated the patent rocking chair.

"I'm no moron, Nancy. I knew when I found you staring out of the window in the dusk, that you were planning your escape. That's why I opened the door into that frigid hall. The aroma of broiling steak was in the air and I felt sure it would revive that fainting spirit—stiffen the backbone—stir your pioneer blood—"

"Hush up," warned Nancy. "Our voices will disturb Cousin Columbine, and she admitted sitting up to an unheard of hour. Say!" the girl

came nearer, whispering: "Did you ever see anything more—more soul destroying than this room?"

Jack grinned, gesturing with a thumb toward his own quarters.

"You should see mine! Not even a view, my dear; and it lacks this handsome walnut furniture." The boy's eyes shone with merriment; and though she wouldn't have believed such a proceeding possible a few hours earlier, Nancy laughed a little. She didn't realize that after a leave of absence her sense of humor was returning, but she knew that something made her feel better.

"It was a wonderful supper, wasn't it?" she murmured.

"Trust you to appreciate it! And what swell china! I wish Aunt Lou could see it."

"It came from Denver in 18—well, eighteen—something—or—other, anyway. There's a complete dinner set. Imagine choosing that awful green-brown pattern! And Cousin Columbine's so proud of it, too. How on earth does she remember the date that everything was purchased?"

Jack shook his head, remarking in muffled tones: "She's a wonder, isn't she? Who else would have thought of cooking up that letter as a—what did she call it? Character test? You've got an awful lot to live up to, Sis, if you ask me. Hop into bed. I'll open the windows. And don't forget that breakfast's at seven sharp."

Sleep did not come quickly to Nancy that night. She lay there under a patchwork quilt (whose weight, she wrote Aunt Judy later, was "almost crushing"), and thought about the evening that had just passed. There must be some truth in Jack's statement regarding the sirloin steak. What else could account for her more cheerful frame of mind? For Nancy had been ravenous despite that slice of chocolate cake—the ugly, green-brown china, and a lamp in the centre of the table that was homely enough to ruin almost anybody's appetite.

There was no doubt that Aurora could cook a steak; and with unexpected tact, Jack had done most of the talking, leaving his sister free to get herself in hand after what she now called her "brain storm." And when Aurora had gone, Jack carried that awful lamp into the sitting room and Cousin Columbine remarked casually, though her eyes twinkled: "I suppose you're thinking me an outrageous humbug. Sit down, my dears, while I confess."

This confession with its illuminating detours into the past, had kept Columbine Nelson talking until long after her customary bedtime.

"I'm going clear back to the beginning," she explained, "so you'll understand, if possible, just why I posed as a tottering old relic, too frail to stay alone at night. The truth is, there's nothing to be afraid of here, and if there were I wouldn't turn a hair. To one who can remember the Indian troubles of 1868, and as a child has hidden for hours in fear of hostile savages, well—you can readily see why an ordinary prowler would be tame in comparison!"

She looked up, smiling; while Jack, eyes popping out of his head, exclaimed: "You really lived through things like that?"

"Why not?" asked the old lady calmly. "This was nothing but wilderness when I was born. As you've heard tell, my first home was a covered wagon which, naturally, I don't remember. I do remember a house with a dirt floor and a stone fireplace in one corner, however; and dimly recall the furniture made from poles and rough-hewn lumber. It was home, and nothing to be ashamed of because no one else nearby had anything better."

"But wasn't it frightfully cold?" said Nancy. "A dirt floor, I mean?"

"I suppose it must have been—at this altitude; but Mother took care that I shouldn't suffer, of course. I can remember being tucked up on the bed with quilts all 'round me, watching the snow swirl against a tiny window, and loving it—I was so warm and cosy! It was my mother who suffered. Men can stand hardships better than women; and even in those days Father seemed always to be—well, my dears, to express it as you would, he seemed to be having the time of his young life."

"Did that cabin stand where this house does now?" Jack questioned.

"Very nearly. It was a bleak spot then. Except for the big pine beside the barn, Father platted every tree himself after he built the mansion."

"But why, when there was plenty of land to choose from, didn't you build back in the woods where it was sheltered?"

"Fear of two things," responded Cousin Columbine. "Fire, and Indians. If the savages were to at-

WAS CONSTIPATED FOR 30 YEARS

Woman's Long Search for a Remedy

The trouble with most remedies for constipation, as this woman found, is that they give only temporary relief. Having at last found a permanent corrective, she writes to tell us about it:—

"For upwards of 30 years I was a victim of acute constipation. I tried practically everything that it was possible to try. I admit I was a chronic case, and every new remedy I tried helped for a day or two—after that I was just as bad as ever. Three months ago I took my first taste of Kruschen Salts, and every morning since, and every morning so long as I live, my first duty upon rising is my Kruschen. I honestly feel a different woman. My bowels act to the clock, and my friends remark how well I am looking. My only regret is that I didn't try Kruschen years ago."—(Mrs.) A. M.

Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The six salts in Kruschen stimulate your internal organs to smooth, regular action. Your system is thus kept clear of those impurities which, allowed to accumulate, lower the whole tone of the system.

tack us, we at least had a chance to see them approaching if we were in the open. And a forest fire's a terrible thing in the wilderness, Jack. I recall when I was a tiny girl, watching one at night with my courageous little mother. We were all alone, Father having gone to California Gulch in search of gold. Looking back on those times, I don't see how she endured his absences, even though there were other cabins not far away. That fire was a terrifying sight, my dears. It must have been miles off, but looked almost near enough to touch. The growth was very thick and tall just there, and the flames seemed to leap from tree to tree, and as they reached the top, shoot up into the air, far up, higher than you'd believe possible, before subsiding. I have never forgotten it."

Nancy shivered; and Cousin Columbine continued: "So you see why we built in this bare place."

"And did your father find the gold?" Jack questioned.

"Not then. Not ever to any great amount. It was Leadville silver which built this mansion; but poor Mother never saw it. She died in 1874, when I was fifteen. A wonderful woman, my dears. She had the true pioneer spirit, but not the body to stand up under the pioneer hardships. She was only thirty-five when she left us to join my little brother who died in infancy."

(To Be Continued)

THE RHYMING OPTIMIST

By Aline Michaelis

THE DREAMER SINGS

Give me a star in the tree tops
And a willow tree by the wall,
Then you of the world can have your world
With its splendor and pride and all!

Ever the star has charmed me
As in deeps of space it has swung,
And the whispering leaves have brought me peace
With the little songs they have sung.

Echoes have reached me faintly
From the world which lies without,
I have heard of its subterfuge and pain,
Of its mazes of hate and doubt.

Give me a star for promise
And a tree to sing me to rest,
Then you who love toil and bitter strife
Can have my share of the quest!

Sound travels four times faster
Through water than it does through air.

Historic Rock Blasted

30-Foot Lip Overhanging Gorge Slips Away

With flashes of flame and a rumbling that introduced a new note into the age-old symphony of the Niagara cataract, 2,000 tons of rock were hurled into the gorge at the foot of the falls at Niagara Falls, July 1st, as two explosions shattered part of Table Rock, famed look-out point at the brinks of the falls.

While a holiday crowd estimated at 40,000 persons viewed the brief spectacle from United States and Canadian sides of the river, 1,000 tons were blown into the gorge. Scenic beauty and contour of the falls was unaffected.

Preparations for the blast have gone on for a month.

Eighty-five holes, each 15 feet deep, were drilled into the lip which had a length of 150 feet and a thickness of 15 feet. Into each were placed three sticks of dynamite and five pounds of black powder after the holes had been dried by compressed air.

The ledge, estimated by parks commission officials to contain more than 5,000 tons of rock, was blasted because a 30-foot lip overhanging the gorge—the spot which came to be called Honeymoon Point, after visits of scores of honeymooners—was declared unsafe due to erosion.

Great Aid To Buyers

Newspaper Advertising Helps People Who Purchase By 'Phone

Modern life is much different today from what it was a decade ago. To-day, a great deal of buying is done over the telephone.

This, in turn, means that opportunities for purchases advantageous to the buyers are now almost completely centred in newspaper advertising.

The modern housewife knows what she wants, knows by brand name, and orders in that manner—because advertising has taught her how she should do it and why it is profitable for her to do so.

Imagine ordering from an unknown grocer "some breakfast food," "some bacon," "some coffee," "some bread"—and so on, as in the olden days before advertising became the powerful force it is to-day!

First Horseless Brigade

May Decide Future Organization Of British Army

The first horseless brigade in history has taken the field under its commander, Major-General H. M. Wilson, and has fought its first "engagement."

This experimental brigade may decide what the future organization of the British Army is to be.

The elimination of the horse and mule has brought about a collection of steel substitutes varying in utility and speed from the pedal bicycle and motorcycle to the high-powered automobile and truck.

General Wilson and his officers will study the problem of the efficiency of cars and trucks in the replacement of chargers and mule teams.

China's first all-Chinese golf tournament in Shanghai was won by J. M. Tang, aged 49.

"What's wrong with this Mustard, Mary? It's very poor stuff!"
Why John—

I thought I was getting a bargain—a big bag for 10c

"It's no bargain at any price! I'll bet you would get more actual mustard in 10c worth of Keen's than you would out of any 10c substitute. The extra bulk is only flour, ground up hulls and colouring matter!"

"You're right! From this time on I'm going to stick to Keen's."

KEEN'S D.S.F. MUSTARD

Made from seed grown especially in the Fens of England. The shells or hulls are removed, all the virtue being in the inner part of the seed. A superfine grinding makes the full flavour readily available. In original tins for as little as 10c.

Colman-Keen (Canada) Limited
1000 Amherst Street Montreal, Que.

Little Helps For This Week

The righteous shall be glad in the Lord and shall trust in him. Psalm 44:10.

The heart that trusts forever sings,
A well of peace within it springs,
Come good or ill,
Whate'er today, tomorrow brings,
It is His will.

He will weave no longer a spotted life of shreds and patches, but he will live with a divine unity. He will cease from what is base and frivolous in his life, and be content with all places and with any service he can render. He will calmly front the morrow in the negligency of trust that carries God with it, and so hath already the whole future in his heart.—R. W. Emerson.

He who believes in God is not careful for the morrow but labors joyfully and with a great heart. He must work and watch, yet never be careful or anxious, but commit all to Him and live in serene tranquility; with a quiet heart as one who sleeps safely.—Martin Luther.

Enters Gentle Class

The breathless onion is almost ready to make its appearance on the cosmic scene, Lloyd Shanklin, G.C.F.P., president of the United Brotherhood of Vegetarians, announced. Shanklin said the new onion was so different from the present tearful species that it didn't even taste like an onion. It is odorless and stainless.

Seen But Not Heard

Giraffes have not a single vocal cord in those long necks of theirs, which is the reason they are like good little girls and boys and are seen, but not heard. For giraffes hardly ever make a sound.

The spring flow of 23 rivers in White Russia is being studied to ascertain the power resources of Soviet Russia.

RESTRICTED OUT OF BUSINESS

"Are the small farmers and others being restricted out of business? It certainly looks that way with all the new legislation, marketing regulations, etc. It is becoming harder for the small farmer to carry on and the ranks of the relief classes are gradually swelling. Whether or not this is the objective of provincial and federal authorities, definite announcement has not been made—but that is the effect all this new marketing regulation is having.

The small dairy farmer has been almost squeezed out of existence by the grading of barns and other restrictions instead of grading the product. The small farmer who buys a few acres of land and a cow or two to help himself off relief, finds that he must sell all the produce from his cows on the surplus market unless he purchases a "going concern" with an established quota. What chance has a man got to carry on while selling his milk on the surplus market?

Farmers of the Fraser Valley are now up in arms in regard to the sale of potatoes. Those farmers who worked long hours and sweat to prepare their land and plant potatoes now find that the "authorities" step in and dictate to them when they shall dig those potatoes and how they are to be sold with the result that many of the early varieties of potatoes are still in the ground, the owners are not permitted to dig and market them, while they are reported to be spoiling, and the main potato crop just about due. The complaint is being made that some of the larger potato growers have been permitted by the Marketing Board to dig and market their potatoes while the crops of the smaller growers are being held back.

A woman in Vancouver tried in vain to secure some Okanagan tomatoes this week as was told by some of the merchants that these tomatoes were being held by the Marketing Board. Evidently the woman wanted the tomatoes and the grower wanted to sell them, but the officious members of the Marketing Board interfere with the natural law of supply and demand and forbid the desires of both the producer and consumer.

It is another case of man trying to improve upon natural laws and it just won't work. Instead of reducing middle costs so that goods can be sold at a lower price and thereby increase consumption, the establishment of more middle costs means higher price to the consumer and less consumption, while the producer is on the losing end.

These so-called business managers of the peoples' business are making things tough for the individual who would like to be independent and keep off relief. If it is their intention to drive these people on relief, well the quicker it is done the better."—Langley Advance

"I PAID A FAIR PRICE"

"Following is an attractively displayed advertisement presented by a Canadian wholesale house to merchants who display its goods:

"I paid a fair price for this article...in doing so I know I purchased something that will give me service and satisfaction...the person who sold it to me made a fair profit...those who collaborated in its distribution received a fair price for their efforts in placing it where I could buy it without undue effort...the manufacturer who devised the article and organized men and machinery to produce it secured sufficient money in return to justify a continuance of his investment in his business...the workman who made it received a fair living wage.

"I paid a fair price...in doing so I passed by the cheap and shoddy material that could not render me service nor give me satisfaction...I did not patronize the chiseler, the cheap imitator, the cold shrewd distributor...nor was I responsible for encouraging and keeping in business the sweat shops.

"I paid a fair price...in doing so I believe I have rendered a distinct service to myself, my community, my country, and to all those who subscribe in a practical manner to the true meaning of—

"Live and let live."

THE OTHER ANGLE

"We have no love for Fascism, or its first outstanding exponent, the swashbuckling Mussolini. Nevertheless, we cannot join with any enthusiasm in the outcry now being raised against that wolfish personality and his country.

England, France and America, because of their own exploiting interests in China, could not agree upon joint action to prevent Japan's rape of Manchuria and the over-running of northern China and Mongolia, which is now proceeding. The League of Nations proved futile in that case because of the mutual jealousies of its major members and it is only too probable that when it meets this week to consider Abyssinia it will be equally impotent.

Just as the considerable natural re-

(Please turn to opposite page)

COAL AND GRAPHITE DEPOSITS UNEARTHED BY ROAD GANGS

Outcrops of coal and graphite were bared last week on Town Hill road, Vedder mountain, by a road gang, rebuilding the grade under direction of Foreman E. V. Bellerose. Whether the seams are of sufficient size or quality to be commercially available has not yet been ascertained, but the coal burns and the graphite appears to be characteristic in color and texture.

"But we won't quit getting out our winter's supply of cordwood yet" observed Mr. Bellerose.

The entire road for a distance of 200 feet was carried down the mountain side last winter by a slide, and the re-building was started two weeks ago with provincial government assistance.

STAGES DETOUR ON CHILLIWACK ROUTE

Owing to road repairs being effected on the Sumas Prairie, the Pacific Stage Lines buses are now obliged to detour after leaving Abbotsford, via the old Sumas Highway, entering the new highway again at the Vedder pumping station. Westbound stages follow this detour in the reverse order. This detour will be in effect until about August 20.

Passengers destined to points between Abbotsford and Vedder Pumping Station are issued tickets to points on the detour nearest to their destination.

Messrs. T. Andrews, H. McDonald and C. Mullins went on a fishing trip to Hope last week.

Rev. E. R. Scratch, who was recently injured in an automobile accident, visited friends in Abbotsford on Sunday and also preached at the Pentecostal Tabernacle in the evening. Mr. and Mrs. Scratch left for Grand Forks on Tuesday, where they will spend a month's holiday with Mrs. Scratch's parents, before resuming duties at the Tabernacle in Abbotsford.

Good News for the Nibblings

Here's good news for Mr. and Mrs. Nibblings! The Gimlets, their next-door neighbors, had a telephone installed today.

Ever since they moved into the neighborhood, the Gimlets have been using the Nibblings' telephone, although very often it hasn't been convenient for the Nibblings to let them in. The good-natured Nibblings have said nothing, but they've thought a lot.

At last the Gimlets have realized that they've been a nuisance. That new telephone is going to make both households much happier.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Customs and Immigration Building, Huntingdon, B.C.", will be received until 12 o'clock noon, (daylight saving) Tuesday, August 20, 1935, for the erection and completion of a Customs and Immigration Building at Huntingdon, B.C.

Plans and specifications can be seen and forms of tender obtained at the offices of the Chief Architect, Department of Public Works, Ottawa, the Resident Architect, Post Office Building, Victoria, B.C.; the Caretaker, Post Office Building, Vancouver, B.C.; The Building and Construction Industries, 342 West Pender St., Vancouver, B.C.; and at the Post Office, Huntingdon, B.C.

Tenders will not be considered unless made on the forms supplied by the Department and in accordance with the conditions set forth therein. Each tender must be accompanied by a certified cheque on a chartered bank in Canada, payable to the order of the Honourable the Minister of Public Works, equal to 10 per cent of the amount of the tender, or Bonds of the Dominion of Canada, or of the Canadian National Railway Company and its constituent companies, unconditionally guaranteed as to principal and interest by the Dominion of Canada, or the aforementioned bonds and a certified cheque if required to make up an odd amount.

By order,
 N. DESJARDINS, Secretary,
 Department of Public Works,
 Ottawa, July 23, 1935.

ABBOTSFORD SCHOOL BOARD
TENDERS
 TENDERS are invited for the supply of fifty (50) cords of hard wood, cordwood length, to be delivered during the month of August to the Abbotsford Public School.

All tenders to be in the hands of the Secretary by 12 o'clock noon, August 7th, 1935. The lowest or any tender not necessarily accepted.

ABBOTSFORD
 Earl McKernon of Calgary is visiting with his aunt and uncle, Mr. and Mrs. O. Thompson.

Mr. and Mrs. Gordon Peardon and family returned home on Sunday from a two-week holiday at Cultus Lake.

"Smiling" Billy Blinkhorn and his B. C. Rangers orchestra provided the music for the dance in the Orange hall last Friday. While the crowd was small, a jolly evening's enjoyment was provided.

Mrs. Heller visited Seattle friends early this week.

Billy Hills, mechanic in the Weir garage, has gone to the Interior, where he secured a job.

Gleanis Walters, daughter of Mr. and Mrs. G. Walters, in receiving medical treatment.

Mr. J. D. Clarke is building an extension to his house.

Mr. and Mrs. J. Gilmour arrived home from an enjoyable visit with friends and relatives in Edmonton and Kitscoty, Alberta.

"Crop conditions in northern Alberta are good this year" the Abbotsford commissioner observed. "It is certainly good to again see the wide fields of wheat nicely 'headed' out."

Cycling 3,400 miles in thirty-three and one-half days, Ralph Fountain, an Abbotsford boy, arrived in Orangeville, Ontario, last week.

He left Abbotsford in May, with a complete camping outfit on his bicycle, and crossed the border at Sumas. He visited with friends in Red Deer, Alberta and other western points en route to Orangeville, where his grand-parents and other relatives reside.

THIS MAY BE Your Car

IF YOU DON'T GET BLOW-OUT PROTECTION

Maybe you don't think blow-outs are dangerous. You would if you heard what we hear every day—if you heard motorists tell of the blow-outs they've had. They say they're through taking chances. And they're equipping their cars with Goodrich Silvertowns. For Silvertowns are the only tires made with the Life-Saver Golden Ply.

NO EXTRA COST
 Why not get the Life-Saver Golden Ply blow-out protection found only in Goodrich Safety Silvertowns? You'll also get positive protection against dangerous "tail-spin" skids. And remember, Silvertowns cost no more than other standard tires.

LOOK FOR THE MOUNTIE

FORMER RUSSIAN GENERAL DIES AT HIS HOME HERE
 Andre Konstantinovich Metrofanoff, Marshall Rd., Abbotsford, passed away on Friday morning at his home, at the age of 63 years. He had been ill for several weeks.

The late Mr. Metrofanoff was a general in the former Russian Royalist Army, and became one of the White Russian refugees. He came to this country with his wife and mother-in-law, and settled in this district about ten years ago, operating a chicken farm.

Surviving the deceased are his wife, at home, and a son, Vladimir, in San Francisco.

Kizium officiating. Interment took place in Hazelwood cemetery. Henderson Funeral home conducting arrangements.

Tea at its Best "SALADA" TEA

Be Careful!

On Dominion Day in a riot at Regina, precipitated by relief camp strikers when police attempted the arrest of their leaders, one man was killed, in the neighborhood of one hundred persons more or less seriously injured, and damage done to property estimated at around \$25,000. The news of this happening filled the papers, newspaper's "extras" flooded the streets, reports were telegraphed all over the continent, and cables carried the news to Great Britain and foreign lands. For a time it was almost the sole topic of conversation, and called forth questionings and discussions in the House of Commons. The Federal Government promised a searching investigation.

The Ontario Government is publishing a series of advertisements in the newspapers of that province. One such advertisement appearing almost simultaneously with the Regina riot says: "In Ontario, during 1934, there were nearly 10,000 automobile accidents, 512 people were killed, 8,990 people were injured, a considerable increase over 1933." No estimate was given of the property damage resulting from these 10,000 accidents, but it must have reached a total well up into the hundreds of thousands of dollars, if not into the millions.

Here are two sets of figures—two pictures if you will. Just consider them for a moment.

In the one instance, one man was killed and approximately 100 persons injured, most of them only slightly. Yet the whole Dominion is shocked, parliament is aroused, the law has been ignored, flouted, a crime committed. Immediate government action is demanded by practically all the people.

In the other instance, over five hundred times as many people were killed, thousands were injured, many of whom were maimed and disabled for life, property damage was enormous. But only a passing mention in the local newspapers at the time of each accident, and possibly some casual local comment, but, generally speaking, the public displays little concern and accepts the situation with smug complacency.

Is it not time that the Canadian people shed their indifference in regard to these day by day highway tragedies, and bestir themselves to put an end to such wholesale killing? The Ontario Government says in its advertisement that "Ontario must start 'thinking' safety; that it must be evident to all thinking people that 'this must stop'."

But how is it to be stopped? It is quite correct to say that people must "think" safety; but they must put their thinking into actual practice and "act" safely. But, people will say, in the Regina incident the law was broken. But, so, too, was the law broken in the vast majority of these automobile accidents. Our provincial statute books, and our municipal by-laws, team with laws and regulations governing the operation of automobiles. Constituted authority has done its part in endeavoring to provide for safety, and to the best of its ability it endeavors to enforce these laws and regulations, but it is an enormous task over hundreds of thousands of miles of roads and highways.

There is only one way to stop manslaughter on the highways, and that is for the individual motorists to stop it—stop it by strictly obeying the laws which have been enacted for their protection and for the protection of others. It is disregard of the law that is the root cause of the trouble.

Motorists must discipline themselves; not be disciplined by the law. It is pointed out, for example, that there were more than 800 bicycle riders killed or injured in Ontario last year. Bicyclists, especially children, are often careless. This simply means that drivers of motor vehicles must be "twice" as careful. They must remember that they are in the heavier vehicle. At stop streets and intersections they must "stop". Instead of taking so many things for granted, they must make sure that brakes, tires, lights, are effective; otherwise serious trouble may lie ahead.

Owing to economic conditions of recent years, many worn out and poorly equipped cars are being used. Drivers of these should be exceptionally careful. New makes of cars are more powerful, speedier, and the drivers of these are under a greater responsibility than ever before. They must remember that the old cars are not so speedy, and govern themselves accordingly when passing such cars. These are only a few "musts"; there are many others that might be mentioned.

Some motorists resent all these laws and regulations. They deliberately ignore "stop" signs, and take all manner of chances while knowing their action is contrary to law. But with the mounting toll of deaths and accidents there is bound to be more law, not less, greater restrictions instead of fewer of them. Public opinion will demand and insist on this. So if motorists desire to be free of so much law, they must refrain from being a law unto themselves; rather they must discipline themselves and not act as if they were above all law.

On the other hand, pedestrians and others than motorists using the highways must recognize that motorists have certain rights which ought to be respected. It is largely through the payment of license fees and gas taxes by motorists that our modern highways have been created and are maintained for the use of all. And accidents are by no means uncommon where the motorist is entirely blameless.

Canadians are reputed to be a law-abiding people. A riot is an exceptional occurrence in this country. Law must be respected and obeyed. But in view of the awful death and accident toll on our highways, there should be—must be—not merely observance of the letter of the law, but the whole spirit of it. In a word, the most important law of all for motorists, pedestrians, and others, is "Be Careful". Being careful, practising safety first, will result in the observance of all law.

Makes Ideal Insulator

Unexpected virtues have been discovered in the lowly seaweed. When tightly packed it forms an ideal insulating material, keeping out cold, noise, water, or even fire. Scientific tests prove that a mat of seaweed half an inch thick is more effective than a brick wall twelve inches thick. The seaweed has besides only one-fourth the weight of ordinary insulating material.

City In Miniature

A lilliputian city, the model of which is four feet six inches long and 18 inches wide and constructed of thousands of bits of wood and cardboard, has 150 street lamps, each made of a bent pin and a glass bead; automatic traffic signals; telegraph poles made of pins with every cross-arm soldered on separately, and the trees, made of sea pinks, dried and painted. The model was built by a Plymouth business man.

China Growing Tobacco

As a first step toward attempting to decrease China's very large importations of American tobacco, the ministry of finance has instructed the tobacco and wine tax bureau in six provinces to experiment with the planting and growing of American tobaccos on Chinese soil.

Seventy of every 100 men in Birmingham who were idle in 1931 have returned to work.

Must Have General Knowledge

Recruits To Metropolitan Police Have Tricky Test

Somebody should revise that song, one line of which runs "If you want to know the time ask a policeman!" These days it does not go nearly far enough in London.

For instance—do you want to know the advantages of the hire purchase system to the buyer? Or to the seller? If you are at all curious about it—ask a policeman.

Or do you want to know why a steel ship floats? Ask a policeman.

If in an unduly enquiring mood you can ask the same constable why a fire burns more rapidly if a newspaper is placed in front of it, why a steam engine has a fly-wheel; why tinned goods remain in good condition for a considerable time; why lead is commonly used for water pipes in houses.

Or being of a more sporting than scientific frame of mind, ask the same constable to describe to you what is meant by a knock-out, evens on the field, a stymie, catching a crab or body-line bowling.

The new policeman will be able to answer you with ease on each or all of these posers, and a good many others beside.

The reason? Well, these were some of the questions given to recruits to the Metropolitan force, and they were only allowed an hour in which to answer them.

There were more, even more tricky, but the above is a good sample.

Astronomer Views Sun Spots

These Spectacles Resemble Large Whirlpools Of Flame

Whirlpools of flame, large enough to swallow up the earth, are marching across the face of the sun.

Clouds stayed away from the sun long enough recently to give H. S. McClung, Regina optometrist and amateur astronomer, and visitors a glimpse of the sun spots.

The spots at present consist of a group of three or four near one edge of the sun's face and a single large one near the opposite side of the 850,000-mile wide disk.

Sun spots, similar to cyclonic disturbances in the earth's atmosphere, are whirlpools or whirlwinds in the brilliant outer envelopes of the sun, exposing the darker inner portion.

About two years ago a period of sun spot activity was entered and the activity will last for about another nine years.

Some persons attribute disturbed weather conditions on the earth to the sun spots. They are believed to produce, also, spectacular displays of northern lights.

Study Water Resources

Engineers Now Engaged In Work Over Wide Area

Geological survey of the southern drought section of Saskatchewan is under way.

Recently, 80 senior students, drawn from the engineering department of the Saskatchewan University, started work.

Travelling in 16 up-to-date motor trucks, the survey parties will investigate water resources of approximately 100,000 square miles in southern Saskatchewan and south-eastern Alberta.

The survey party has been organized under the direction of Dr. B. R. MacKay, Dominion geologist, and the area extends from the Manitoba boundary west to near Lethbridge, and from the international boundary north to near Saskatoon.

Empty House Costly

Manor Heath, one of the most famous mansions of Halifax, England, and the house in which the King and Queen resided in 1912, has been standing empty since the city bought it for \$92,500, five and one-half years ago. It has been estimated that, with the cost of upkeep plus the interest on the purchase price, Manor Heath is costing Halifax \$500 every month.

STOP THAT ITCH In One Minute

D. D. D. Prescription Speeds Relief

It is really surprising to see how Dr. D. D. D. Prescription quickly stops itching tortures of eczema, pimples, mosquito or other insect bites, rashes and other skin afflictions. Forty years' world-wide success. Its gentle oils penetrate the skin, soothing and healing the inflamed tissues. No fuss—no muss. Clear, greaseless and stainless—dries up almost immediately. Try D. D. D. Prescription today. Stops the most intense itching instantly. A 35c trial bottle, at any drug store, is guaranteed to prove it—or money back. D. D. D. is made by the owners of ITALIAN BALM.

Millionaires Leaving

Heavy Taxation Cause Of Canada Losing Two Wealthy Citizens

The Toronto Telegram says "Canada is to lose two of her wealthiest citizens, and, incidentally with their departure the federal government's annual income tax will be reduced by several million dollars."

"The recent report that William H. Wright, with an annual income of about \$2,000,000, is definitely leaving Canada, is now followed by one that Harry Oakes, who possesses an income of nearly \$3,000,000 a year, may also leave the country to reside permanently in England," says the Telegram.

"The income tax paid by these two men alone to the federal government amounts to nearly \$3,000,000 each year," according to the Telegram.

While Mr. Wright, vice-president of Lake Shores Mines and vice-president of Wright-Hargreaves Mines, has definitely announced his intention to leave Canada, the Telegram adds "color is lent to the reported exodus of Mr. Oakes by his recent resignation from the presidency of Lake Shore Mines."

According to the Telegram, Mr. Oakes has bought a house in London, England, and it is rumored he will take up residence in the Channel Islands. Mr. Wright leaves in September for the Channel Islands and may visit Bermuda before he decides where he will make his new home, says the Telegram.

Rust Resisting Wheat

Scientists Have Advanced Far Towards Reaching The Goal

Hope for development of rust resisting winter wheat was focused by Prof. T. A. Kiesselbach of the University of Nebraska upon the state's present stem rust scourge. Spring wheat scientists, he pointed out, already have advanced far toward this goal. The noted agronomist said the 1935 fungus threat spurred a generation-old search for immune varieties of grain. He is experimenting now with a special strain that may greatly reduce the susceptibility of winter wheat to stem rust.

He pointed to the planting of 3,000,000 acres of "Ceres" spring wheat, developed largely by Dean C. B. Waldron of the North Dakota Agricultural College, and said it would not suffer half as much from stem rust as other varieties.

Hot Weather Story

Toronto Man Tells Weird Yarn About A Fish

Five Toronto fishermen declare this to be a true fish story.

When Walter Sampson, Toronto, landed a large bass at Lindsay it fell on a rock, freeing itself of the hook. Then it reared up and started dancing straight at him.

The bewildered fisherman picked up a heavy stone to stop the fantastic progress of his catch, when he noticed the fish was being borne swiftly along by a four-foot water snake.

The snake glided to the water's edge where it released the fish, which swam quickly away.

Testing Arctic Air Service

Soviet Aviator Takes Three Passengers On Trial Trip

With three passengers F. M. Kuksanov, veteran Soviet flyer, recently took off from Moscow, Russia, on a flight scheduled to end at Wrangel Island, and to cover en route the polar and fur-trading stations of the Main Administration of the Northern Sea Route. The flight covered nearly 11,000 miles. The object of the trip, a test for both plane and pilot, was to ascertain the advisability of carrying passengers on such a long flight, and to check up on the work of the polar stations and their preparations for the coming navigation season.

Book Would Be Interesting

The Animal Welfare Society of South Africa is desirous of publishing in booklet form, for the use of congregations of all denominations on Animal Sunday, a collection of suitable hymns in English and Afrikaans. The assistance of the public is invited, and prizes of ten dollars are offered for the best hymns submitted in each language.

Thousands For Charity

Students of Glasgow, Scotland, collected a "mixed bag" during their recent charity-day street solicitations. The total amount raised was \$50,659. The only gold received was a half-sovereign, valued at \$250. There was \$30.60 in half cents and \$27,860 in pennies. There also was an I.O.U. for \$100.

FASHION FANCIES

DOUBLE-DUTY DRESS WITH JACKET

By Ellen Worth

Another delightful little jacket dress—if you're needing something fresh and tubbable for warm days.

So lovely to look at as well as so practical to wear.

A very pretty effect is the plain sky-blue shantung bodice against the navy dotted sky-blue shantung as pictured.

This jacket dress is equally attractive carried out in sheer cotton prints, pastel tub silks, linen, etc. Few models could be simpler than today's with its sleeveless dress and raglan sleeved jacket.

Style No. 938 is designed for sizes 14, 16, 18 years, 36, 38, and 40-inches bust. Size 16 required 4 yards of 39-inch material with 1 yard of 39-inch contrasting.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

Fast Train

Germany Has A New Streamlined Streaker

Nazis unveiled their latest in railroad engineering, the new super-streamlined "Dashing Cologner", which streaked the 355 miles between Cologne and Berlin in five hours, nine minutes. This was not a record, but engineers claim the cream and violet colored Diesel-electric engine can reach a top speed of 120 miles an hour and is therefore the world's fastest train. It pulled two coaches, holding 81 passengers.

Carp Sometimes Edible

Although carp are scorned by many fish eaters, according to the Michigan fisheries division, the carp is as edible as many varieties of gamefish when taken at the right time of the year—during the cold months—and when properly prepared.

British Mystery Air Craft

Claimed To Be The World's Heaviest Armed Air Fighter

The new British mystery aeroplane "Falrey Fantome," claimed to be the heaviest armed air fighter in the world, will be brought from its closely-guarded hangar at Hendon soon to roar over the heads of experts in a display for the Society of British Air Craft constructors.

The ship carries four machine guns, one on each lower wing and two atop the fuselage, and also a quick firing gun which throws 20-millimeter shells.

The magazine of this gun carries 60 shells, fired through the propeller hub instead of through synchronized spaces of the whirling blades.

This new machine, expected to reach a speed of 250 miles per hour, has been secretly constructed at a British factory to compete in the international fighting plane competition to be held in Belgium in July.

Advertising Canada

Australian School Children To Write Essays On The Dominion

Australian school children will be encouraged to learn about Canada.

Hon. R. B. Hanson, minister of trade and commerce, explained money voted would be used to conduct an essay competition in Australia among secondary school pupils. A prize of a trip to Canada would be the reward of the pupil who wrote the best essay on Canada.

A similar competition had been conducted in Canada by Australia. Mr. Hanson said the winning pupil was now enjoying her trip to the southern dominion.

Human Slate

Skin Of Toronto Boy Registers Writing Like A Blackboard

Toronto has a human slate. He is John Darch, 17, whose skin responds to a stick in the same way a blackboard responds to chalk.

Take a stick and write on John, and what is written takes visible shape in the form of a welt that can be felt when a finger is passed over it. How long the writing remains depends on the pressure applied.

Evidently Liked Cago

A trailer containing three lions broke loose from a circus truck in Dallas Texas, smashed into a ditch and jarred the cage door open. R. Thomas, the truck driver, went for help. Police arrived and found the three lions peacefully sitting in the cage—the door still wide open.

Sylvania is about 100 miles south-east of Prince Albert.

Says Agriculture Will Continue In The West In Spite Of Any Drouth

Agriculture can be and will be carried on successfully on the open plains of western Canada notwithstanding drought conditions, said Hon. J. G. Taggart, minister of agriculture in Saskatchewan, in addressing a session of the convention of the Canadian Society of Technical Agriculture at Edmonton. His subject was "The Western Drought Situation."

Grain-growing will be the type of agriculture that will be chiefly followed, in Mr. Taggart's opinion, but other types of farming will be followed as supplementary sources of revenue.

There will be a tendency, he thought, to larger farms and also toward the creation of reserves to provide against times of adversity.

Mr. Taggart, in dealing with the problem of the dry belts, did not regard Alberta's experience with irrigation as sufficiently satisfactory to be followed in the other provinces.

Conservation of water for crop production by dry farming methods is the most important way of improving the stability and productivity of the drought areas, Mr. Taggart believed, and he added that with an average rainfall it should be possible to store from four to six inches of water in summerfallow land. This he regarded as generally more than could be provided by any feasible irrigation scheme in his province.

Crop rotations will not solve the problem of soil drifting or any other important agricultural problem in the open plains, said Mr. Taggart, and cereal production and summer-fallow in cycles of two or three years will be found the best course.

Physical reserves in the form of seed and fodder should be built up, the speaker pointed out, in any dry country. Groups of farmers might combine, he suggested, to carry such reserves, even though co-operative or community enterprises may not yet be possible.

New methods of making land appraisals will be necessary in view of the present financial difficulties of prairie farmers and the debt adjustment legislation now in operation, it was stated in a paper by Prof. H. C. Grant, of the University of Manitoba. In Mr. Grant's absence, the paper was read by F. W. Reinehl.

"The farm mortgage, which was once regarded as a blessing, may now be a curse to both the mortgagee and the mortgagor," thought Prof. Grant. "In the future it may be a share of the social dividend, if anyone knows what that means; but whatever happens, there must be new appraisals of land values."

Instead of farm lands being valued only on a basis of their productive capacity, as emphasized largely under the Farmers' Creditors' Arrangement Act, there must be a consideration, said Prof. Grant, of such points as normal sale value, forced sale value, and speculation, condemnation, loan, and assessed values.

Speaking of conditions in his own province, Prof. Grant pointed out that of 54,000 farms in Manitoba, 19,000 have mortgages on them, totalling \$76,906,000 and averaging \$10.86 per acre. Only one-third of the mortgages are held by loan and insurance companies, it was stated.

After the address by Mr. Taggart, plans of the Dominion government for meeting the problem of the drouth areas were outlined by Dr. E. S. Archibald, director of Dominion experimental farms. Efforts will be made by the federal authorities, said Dr. Archibald, to co-operate to the full with all the provincial agencies in the field, in order to grapple successfully with the problem of the southern prairie region of western Canada.

Dr. E. S. Hopkins, Dominion agricultural husbandman, told the convention that he is optimistic about dry-land farming, believing that it has a more promising future than general farming in eastern Canada.

Some 36,000,000 acres of land in the prairie provinces are affected by dry conditions, Dr. Archibald noted, and to meet the situation thus created a rehabilitation programme has been drawn up under legislation passed this year at Ottawa. The programme is to run for five years, and the first year's vote is \$750,000, with an additional \$500,000 voted later for water development work.

"My, I didn't know that you had electricity 'way out here."

"We generate it ourselves."

"I see, 'Ohm talent'."

Ration For Pigs

The Use And Value Of Pasture For Market Pigs Is Shown

In experiments conducted over a number of years at the Dominion Experimental Station, Lacombe, Alberta, pigs fed on a straight grain ration of barley and oats, and allowed access to a small field or paddock sown to a pasture crop, made from thirty to forty per cent. more rapid gains, and from twenty to thirty per cent. more economical gains than pigs fed in dry lot where no green feed was available, and where they were entirely dependent for their nourishment on the grain mixture supplied in a trough or self-feeder. The pasture crop not only supplies succulence, and to a considerable extent avoids the possibility of worm infestation and disease infection, but it also provides the hog with proteins, minerals and vitamins which are lacking when pigs are fed only barley and oats, and no milk or tankage is available.

Experimental results at Lacombe also indicate that pigs confined to sanitary feeding pens and fed inside under what might be called the Danish plan on a grain ration properly supplemented with feeds high in proteins, mineral substances and vitamins, make faster and more economical gains than pigs fed similar feeds under outside conditions in a pasture lot. In a test conducted during the summer of 1934, Yorkshire pigs fed inside on a grain ration supplemented with tankage, cod liver oil and salt, made seven per cent. more rapid gains and fifteen per cent. more economical gains than pigs fed outside with access to an annual pasture mixture of oats and rye on a ration the same except that cod liver oil was not included. The results of this test would indicate that where sanitary feeding pens are available and the proper balancing of rations can be undertaken, there is no serious need for pasture accommodation for growing and finishing pigs of good bacon type and breeding. However, for growing young pigs, gilts and boars, for breeding purposes, or for carrying breeding stock, boars and sows, pasture and exercise are very valuable.

Where Dickens Got Names

Register Of Holborn Church Furnished Many Of Them

The two names Oliver and Twist are entered close to each other in the files of the parish register of the church of St. Andrew, Holborn. James Twist, the son of a shoemaker, of Baldwin Gardens, Holborn is recorded as having been born in 1813. Oliver is the name of a woman who was entered in the same year. The discovery, is further evidence of the way in which Charles Dickens took many of the peculiar names used in his novels from the register at St. Andrew's. Mr. A. Jones, the verger, in his normal work, has for many years been compiling a list of names found in Dickens from the files of the Parish register between the years 1735 and 1859. There are now on his list over 60 names of people who probably lived in Holborn during Dickens' stay there. Among other discoveries of the probable origins of names are Corney, Rigaud, Todd, Minns, Mobbs, Wicks, Tapley, Heep, Brass, Badger and Harmon.

An Envious Record

Alberta Claims To Be Lower Than Other Western Provinces In Percentage Of Defaults

With a lower percentage of defaults in municipal debentures than various other provinces, Alberta has an enviable record in municipal finance, Hon. J. R. Love, provincial treasurer, stated in an address. Alberta's percentage of defaults was only one-half of one per cent, compared with 19½ per cent. for Ontario, 13 per cent. in Manitoba, and 8½ per cent. in British Columbia and Saskatchewan.

Notice in a church: "Worshippers who intend to put buttons in the collection are requested to give their own and not pull them off the has-socks."

In India, white persons are expected to wear evening clothes when they go to the movies at night.

Fireflies have no particular value, but to devour snails and the larvae of insects.

Wild Mustard Eradication

One Of The Most Difficult Weeds To Deal With

Wild mustard, an insidious weed which grows prolifically throughout Canada on farms and waste places, is one of the commonest and most injurious of the mustard family. A single plant will produce from 15,000 to 20,000 seeds, and a single plant of tumbling mustard is credited with being able to yield 1,500,000 seeds. Eradication of mustard from badly infested land is very difficult as seeds lying several inches below the surface of the soil are capable of retaining their viability for many years without germination. Indeed, experiments have shown that mustard seeds can germinate after having been buried in the soil for forty years. Mustard seeds which have been ploughed under in previous years may be brought to the surface by subsequent cultural operations. In view of these and many other facts, a pamphlet dealing with the eradication of wild mustard has been issued by the Dominion Department of Agriculture, Ottawa, and may be obtained free on application. Since wild mustard seed matures earlier than the earliest grain crop, there is no possibility of harvesting the grain before the mustard has reached maturity. Consequently other methods of control, as advised in the pamphlet, must be adopted.

Radium Found In Russia

Radium, one of the rarest and most costly of minerals, has been found near Elendorf in the Nari-manov region of Azerbeidjan. Still other deposits were discovered in Kurdistan. Soviet research institutes are now studying the specimens of strata containing radium to determine the possibilities of commercial exploitation.

Ancient Exhibits

The British Museum has a piece of iron taken from the Pyramid of Gizeh, which is believed to date from 400 B.C., and an axe head of Egyptian manufacture dating from 1370 B.C.

Vegetarian Fish

Cleared Shallow Ornamental Lake In China Of Weeds

The centre of the campus of Yenching University, American missionary-supported institution near Peiping, China, is a shallow ornamental lake. Some time ago it was noticed that this lake was rapidly becoming choked with weeds. Ornamental qualities were greatly reduced, and freshmen raised objections to being thrown into the weedy waters.

Faced with the problem, the business department purchased a large number of "grass fish." These fish, true to their name, are vegetarians, spurning worms, flies and small fry when they can browse off succulent sea-weed or nibble at grass hanging in the water.

Like other grazing animals, "grass fish" have prodigious appetites and multiply rapidly. Within a surprisingly short period the lake was cleared of weeds.

Books Play Important Part

Have Great Influence On Lives Of Those Who Read

Books may play two different parts in the lives of men. They may be a respite and an escape from life. They may build for us the walls of another and quite separate world in which we can take refuge from all that wounds and limits and frustrates us in this one. Or they may be the daily bread of our thought and action, an element necessary to the practical working of our lives here and now.

But which ever part they play whether they are to us the quiet garden in which the spirit dwells apart, or the fuel which feeds the active, militant mind and arms it for its encounter with hard facts, they become—whether we know it or not—an integral part of the texture of our being.

A leopard seal is the Pacific coast variety of the common or harbor seal which is more spotted than is that of the Atlantic.

Is Possible To Banish Tuberculosis From The Face Of The Earth

Leaf Diseases Outlined

Wheat And Barley Are Subject To Great Many

The leaves of wheat and barley plants are subject to a large number of different diseases which often seriously reduce the value of the crop. The Division of Botany, Dominion Experimental Farms Branch, draws attention to these diseases, so that they may be recognized and proper control used if serious outbreaks occur.

Spot Blotch on wheat and barley is the result of an infection of the plant by a fungus. Oblong, dark brown spots, surrounded by a yellowish halo, are characteristic of the disease. The fungus may cause a root-rot or seed discoloration. The sowing of infected seed results in seeding blight. This disease is very prevalent.

Net blotch—Is found chiefly on barley. The symptoms on the leaves resemble those of spot blotch, but if the spots are examined closely a network of darker lines may be seen in the darkened diseased areas.

Leaf Stripe is confined to barley. The disease is characterized by narrow brown streaks on the leaves. As the leaves wither, a fraying occurs. No heads, or at most, a few, are formed. This disease is different from "false stripe" in which grain-bearing heads are formed and fraying of the leaves does not occur.

As these diseases hibernate on seed, plant debris, or in the soil, control is difficult. Treatment of the seed with Ceresan destroys the fungus. Diseased stubble and straw should be burned. A crop rotation in which sweet clover is included is advisable. Where the crop tends to grow rank, a light seeding is essential to prevent rapid spread of these diseases.

The Proper Answer

Messenger Boy Stood In Well With His Chief

When James Gordon Bennett was at the head of the New York Herald he spent much of his time, in later years, abroad. On the occasions when he did visit the paper none was apprised of his coming. One day, when he was making one of these unexpected visits, he was passing down a corridor when a door flew violently open and a boy dashed out, nearly knocking Mr. Bennett from his feet.

"Here! Here!" expostulated Mr. Bennett. "What's all this? What's all this?"

The boy recognized the chief and, very much confused stammered an apology. "I'm—I'm sorry, sir! I was going on an errand."

"Well! Well!" said Mr. Bennett, "If you are going on an errand that is the way to go," and he pressed a coin into his hand.—Christian Science Monitor.

St. Kilda's Jubilee Gift

It is stated that the King is to have a length of tweed woven from the wool of wild sheep as a jubilee gift from St. Kilda, the evacuated island off the West Coast of Scotland. The Earl of Dumfries, eldest son of the Marquis of Bute, who bought St. Kilda as a bird sanctuary some three or four years ago, is to make the presentation.

Servants On Approval

An "on approval" idea for servants is proposed by a woman's organization in Saxony. Under this plan girls who have just left school will be placed "free of charge" in families where a servant is kept, for a six days' mutual trial. At the end of this period the parties may agree to separate—or spend a further year together.

World's Champion Typist

A new conqueror, Albert Tangora, 32, of New York, today bore the title "world's champion typist." Tangora hit 40,585 strokes on a specially constructed machine in one hour to win the title in the International Commercial schools open typing contest. He averaged 128 words a minute to take the title from George Hossfield, also of New York.

Automobile accidents in the rural regions are currently increasing at a greater rate than in the urban sectors.

Firemen commonly refer to a two-alarm fire as a two-bagger, a three-alarm fire as a three-bagger, etc.

Medically speaking, it is possible to banish tuberculosis from the face of the earth, Dr. H. E. Kleinschmidt, director of health education, National Tuberculosis Association, New York, said in an interview.

"When we say 'abolish', we do so from the standpoint of control. Plague is not gone, but neither does it ravage the world as it once did, because it is controlled," he stated.

Destroying the old theory that T.B. germs are present in every one, merely awaiting a lowered resistance to take active effect, Dr. Kleinschmidt stated that fully 50 per cent. of the youth of colleges and high schools, particularly in urban municipalities, were infected with early stages of the disease.

"On the other hand," he pointed out, "we have isolated communities where virtually all the children are free of it."

This knowledge is what demands of medicine that with the help of the public it drop its defensive war and go out in search of the disease.

"To the present our fight with tuberculosis has been defensive, the isolation of definite cases of the disease, mainly in sanatoria. In the last twenty-five years the death rate has fallen to about one-third and it has dropped from the chief cause of death down to sixth place.

"These facts are leading many people to think that it is no longer a menace. They are dropping their guard," he said.

The only way to go out and fight the disease is to make an examination of all children with the tuberculin test and the X-ray. The test is very simple, harmless and cheap and merely determines whether or not the germs are present, he said. The X-ray is relied upon to disclose whether any harm has been done.

"By this means we hope to anticipate the disease and not wait for it to develop. It is not a matter of expense so much as it is one of organization and public willingness.

"There is no telling where the germs are," he continued in paying tribute to the X-ray, which had almost replaced the stethoscope and "symptoms," in the diagnosis of tuberculosis. "We used to think that undernourished children were the most susceptible to it. You are just as likely to find it in the healthy, well-nourished child.

"Tuberculosis is a germ infection. Not a single germ, but a definite massive infection. They refer to it as a family disease. It runs through families, not that it is hereditary, but solely as an infection.

"A mother, unconscious of having tuberculosis, kisses her infant child on the mouth; that child has the disease," Dr. Kleinschmidt stated, and placed overwork, lowered resistance, and such generally attributed causes as being merely contributory elements once the germs had entered the body.

Speaking briefly of treatment, he emphasized the practice of lung collapsing as "the brightest ray that ever entered the life of a consumptive."

A relatively new method that has been in use upward to ten years, although it was known before that, it merely entails collapsing the lung or an affected part to allow the lung an opportunity to rest. A more radical treatment is to remove sections of the ribs so that the chest caves in and the lung is collapsed. This is a permanent collapsing, and Dr. Kleinschmidt emphasized one fact: "It is not a cure-all. There are cases to which it is not applicable."

Firemen Forgot Hose

Because firemen of Ratisbon, Central Bavaria, forgot the hose when they dashed to a recent fire, the owner of the burned building threatens to sue the municipal authorities for damages. The alert fire fighters answered the alarm promptly and took the latest type of fire engine, but the lack of hose left them nothing to do but stand and watch the building burn down.

A new window-glass is being marketed which eliminates indoor shadows. This is due to the fact that the sun's rays, instead of passing through it as through ordinary glass, are distributed evenly. Further, heat and cold are excluded.

Lions in captivity are said to grow better manes than those living in a wild state.

The SNAPSHOT GUILD

VACATION PICTURES

Land or sea offers unlimited opportunities for snapshotting.

With the arrival of really warm summer weather, beautiful trees and flowers, we begin to think in earnest about outdoor life and vacations. I suppose one could go on a vacation without a camera but that would be like trying to sail a boat without a rudder. To say the least it would seem that something important was missing.

When planning a vacation you should look forward to the snapshots you are going to get, for on your return to home and work, and in later years when your trips become fond memories, you can always turn to your snapshots and enjoy your vacations over and over again. Snapshots pay dividends on your vacation investments in continued pleasure long after your return.

There is one important thing to keep in mind in vacation snapshotting and that is the variety of light conditions you may encounter in your travels. Picture taking might well be classed in four groups, according to the exposure they need, and by adopting as a standard exposure for each group, one that is intermediate between the shortest and longest that will make a satisfactory exposure, there will be only four exposures to consider and these can be memorized.

These four groups are as follows: Number one:—Marine and beach scenes and extreme distant landscapes. Number two:—Ordinary landscapes showing the sky with the principal subject of your picture in

the foreground. Number three:—Nearby portraits in the open shade . . . by that I mean not under trees or the roof of a porch and last—shaded nearby scenes.

These four groups, or classes, just about cover the different types of pictures you will want to take on your vacation. With modern-day film and cameras, exposure problems have been greatly simplified but it is still necessary to use a little good judgment and not expect the impossible from your camera.

There are many types of cameras to meet every requirement of the photographer, whether he is an amateur or a professional, but no camera is capable of taking all types of pictures under all conditions. It is true that some cameras are more versatile than others. One may have an extremely fast lens which permits the taking of snapshots under adverse lighting conditions and if it also has a fast shutter you can take pictures of subjects moving at extreme speeds. Other cameras have lenses and shutters of various speeds to take pictures—and good ones—within certain limits and conditions.

Almost every dealer in cameras and photographic supplies has printed outdoor exposure tables giving details of exposures, etc., in the four classes mentioned above. Ask your dealer for one of these outdoor exposure guides and then go forth with your camera and take the kind of pictures you'll be proud to show your friends.

CARD OF THANKS

Mrs. Metrofanoff, widow of the late General A. K. Metrofanoff, not being able to answer personally to all the friends who have expressed their condolences, thanks everybody for the flowers and attention given to the memory of her husband.

Federal grant of \$15,000 has been secured for Chilliwack by H. J. Barber, M.P., to be devoted to construction of an agricultural building, to be used for the annual fair and for basketball, badminton, box lacrosse, and other sports.

ABBOTSFORD

Guests of Mr. and Mrs. T. L. Rimmer on Sunday were Mr. and Mrs. Appleyard Sr., Mrs. Appleyard, Mr. and Mrs. T. Rimmer, all of Vancouver.

Mr. and Mrs. D. Willan and Audrey have returned from an enjoyable holiday at Coast resorts.

W. J. Gray is managing Safeway meat market while J. Carmichael is upon his holidays.

Bob Carlson, Overwater manager, is progressing favorably after the operation to remove a piece of windshield glass from his eye, and expects to be discharged from the hospital in a week or ten days.

Misses Lena Summers and Betty Shoalts of Weyburn, Sask., who have been visiting at the home of the former's parents, Mr. and Mrs. F. Summers, left for their home yesterday.

Mr. Wm. Derry of Saskatoon is visiting his aunt, Mrs. Moret.

Mrs. S. Griffiths and Miss D. Mouldy are holidaying at Shore Acres.

Mr. and Mrs. John McNeary visited Abbotsford friends on Sunday. Mr. McNeary is mechanical superintendent of Vancouver Sun.

Lieut.-Col. Cope and J. M. Rowley are appointed delegates to the Canadian Legion provincial convention, to be held in Kamloops next week.

Mr. Brown of Glen Valley, tentatively chosen as the Stevens Club candidate for this constituency, made calls in Abbotsford yesterday.

Testimony to the standing of the late General Metrofanoff was the large and representative attendance of his fellow countrymen at the funeral. An army officer of life-long service, which included the Russo-Japanese war, and chief of military police of the Chinese Eastern railway in Manchuria, he preferred the life

BETTER DISTRIBUTION THIS YEAR OF FRUIT, RHUBARB

Better distribution and good markets have favored growers of small fruits and rhubarb this year, G. E. W. Clark, district horticulturalist, of Abbotsford, says. Not only supplying local markets and also the canning and processing requirements, carlot shipments to points outside the province show up very well. Carlot shipments from the Fraser Valley will amount to over 15 cars of forced rhubarb, 100 cars of field rhubarb, and 120 cars of strawberries, Mr. Clark advises. The raspberry crop is not as heavy nor as large as could be desired, but most plantings promise more than many of the growers anticipated.

FORMING STEVENS CLUB HERE

Organization of "Stevens Clubs" is proceeding in the Fraser Valley under direction of Mr. W. D. Johnson of the P.T. Grey News-Gazette, Vancouver. Available citizens in each Valley area are being recruited to the cause of the new Federal political party, Mr. Johnson making arrangements in Abbotsford yesterday for an organization meeting here.

Every single unemployed man in Ontario, physically able to work, will be struck from relief rolls August 1, and heads of families must accept farm work or be similarly cut off. Premier M. E. Hepburn announced last week, following a cabinet meeting.

of an exile in Canada as a small farmer to subvertence to Bolshevik domination—remaining true to his Czar and the royalist ideals.

Mr. and Mrs. Wm. Minns of Vancouver have taken up residence in a Durrant house near the school. Mr. Minns is a photographer.

NOT SCABBING IN ROYAL CITY

Editor News:
In view of the current rumors that certain Hungarians were scabbing in New Westminster on the longshoremen, I, as one of three Hungarians who are employed in Timberland sawmill in New Westminster, state that we have done absolutely no dock work or scabbing on other workers. I trust this will make the matter clear to the agitators who are trying to start trouble.

JOE REBORITS

Jack Murphy, who is working with his father, Ed. Murphy, at Harrison Lake, is home for two weeks. The interior of the Daly hardware store is being re-painted.

Arnold Webster, federal candidate for Vancouver-Burrard, was elected President of the reconstituted C. C. F. (B. C. organization) at the annual convention held on Sunday. He succeeds R. Skinner.

FRASER VALLEY BULBS GROW

SPLENDIDLY IN SHANGHAI
British Columbia-grown narcissi, tulip and iris bulbs were shipped to Shanghai for planting in the parks of that city last fall, and blossomed so luxuriantly in that part of the Orient that a further order has been placed for fall delivery. Shanghai is situated upon a delta terrain similar to lower Fraser Valley, and, although the winter climate is more severe than here, soil conditions are approximately the same.

If you wish to be fair...

PRINTERS in the Fraser Valley are endeavoring to meet from nearby cities a class of competition which destroys business—less-than-cost prices—which, like the scabbing in other lines of work, breaks down the workers' livelihood. If the farmer, mechanic and small business man cannot get a living for his family, what happens?
Forced out of employment by automatic machinery, certain Vancouver journeymen printers have got use of idle presses and type, taken their children from school and set up in business under sweatshop conditions, pricing work at bare cost of paper, for what? ... sacrifice themselves, like many others, at the altar of "unforced overhead" ... and drag down other small printers with them.

Hardware, grocery, automobile and other lines have organized against this eruption of Bad Business. Established printers are desperately endeavoring to do so.

Proximity to Coast cities has always made The News subject to this class of competition. Some of it the local shop can't meet. Most of it it CAN AND DOES meet. This has been our offer in the past; we reiterate it—15% Discount upon every class of ordinary job printing from the trade list of any western city or town in Canada, Winnipeg west. This price applies, and has applied only to "local" work—printing used locally—work which the home shop needs and must have in order to carry on.

If you want to be fair, this is a fair offer, based upon overhead economy.

ABBOTSFORD THEATRE
